**Subject:** Re: Hansville Traffic

Hello John and Jeff,

We have a letter from the Greater Hansville Area Advisory Council formally requesting the traffic calming road improvements we have been working on for over year now. Given the results of the public meeting and the positive community comment ( I have received about four or five against) I am requesting that you add this to the TIP and schedule the work to be done.

I appreciate all the hard work and time that you and Jeff have spent on this project. I know it is a deviation from our policy, but this is a special circumstance where alternate routes do not exist and the commuting public are the members of the Hansville community.

Thanks again!  
Chris

Hi Chris,

Patricia Pinkham called pressing for details for her meeting tonight. I talked to Jon and he is ready to go once he gets the word from you (in the form of an email).

In the meantime he described the process:

- 1) He will write a County Road Project resolution (which will identify where the funds are coming from) and try to get it on the agenda for June 18 (I have already asked Opal to let this in late, the deadline was yesterday)
- 2) It will need to get on a Work Study before the 18th
- 3) He will schedule the work and hire the necessary contractors

He is checking to see if this needs to be advertised, which could change this schedule. He would like to get this done before you leave so he is pressing to get it ready for the June 18 agenda.

I called Patricia and let her know of this process.

K
